	MEMORANDUM FOR THE RECORD	
	SUBJECT: Meeting on Back-Up Ephemeris	
	1. A meeting was held on 8 June 1970 in PPBS on the requirement for	257
•	the back-up ephemeris within NPIC. of PPBS chaired the meeting, and other personnel attending were	25X 25X
	SPO) from RED and from AID.	25 X
•	2. The history behind the back-up ephemeris requirement was dis-	
	cussed by all members present, and a decision was made for AID to proceed with programming to provide this capability for the primary camera.	
	3. The requirement for providing this same capability for the Stellar/	
	Index System was discussed and determined that the back-up ephemeris re-	
	quirement includes the S/I data, but that programming efforts involved in a including this data can be delayed until next calendar year since this S/I	
•	system will not be operational until the June-July 1972 time period.	
•	4. The SPO was tasked to provide to the AID the following	25X
	data by 1 July 1970:	
	a. The formats for the command list data to be generated by STC.	
	b. The formats for the 20-point ephemeris to be generated by STC.	
	c. The formats for the Plum Office transmissions for time, Vx/H, and attitudes during IOC.	
	d. The formats for the transmission of data from the lager Team. This includes operation number, number of frames per operation, and the first and last times for each operation.
